

Report

■ Sleep analysis

Type	Reference value	Detected value		Notes
MTI	1.709	1.059	↓	Masseter muscle used for a shorter time than the reference value
MWI	0.453	0.343	↓	Masseter muscle used with less power than the reference value
BTI	0.417	0.343	=	Bruxed for a conforming time compared to the reference value
BWI	0.196	0.294	↑↑	Bruxed with much more power than the reference value
BPI	0.343	0.327	=	No significant bruxism was detected

■ Awake analysis

Type	Reference value	Detected value		Notes
MTI	15.336	14.636	=	Used masseter muscle for a conforming time with the reference value
MWI	3.810	3.087	=	Used masseter muscle with a conforming power compared to the reference value
BTI	1.497	0.205	↓	Bruxed for a shorter time than the reference value
BWI	0.624	0.182	↓	Bruxed with less power than the reference value
BPI	1.205	0.197	↓	No significant bruxism was detected
